RESTful API

Properties API

1. GET /api/v1/properties

Request:

```
http

GET

/api/v1/properties?type=APARTMENT&dealType=SALE&minPrice=1000000&maxPrice=5000000&

minRooms=2&maxRooms=3&regionuuid=5&agentuuid=42&features=PARKING,BALCONY&includeNo
Coordinates=true&page=0&size=10
```

Response (200 OK):

```
json
  "content": [
      "propertyUuid": "", +
      "userUuid": , +
      "regionId": , - стереть
      "title": "", +
      "type": "", +

```
"phone": "+79167778899",
  "createdAt": "2023-09-01T10:00:00Z",
  "updatedAt": "2023-09-01T10:00:00Z",
  "isBlocked": false
6. DELETE /api/v1/agents/{uuid}
Request:
http
DELETE /api/v1/agents/geerg-gergrg-rgergerg
Authorization: Bearer <admin_token>
Response (204 No Content):
Empty body
7. GET /api/v1/agents/{uuid}/stats
Request:
http
GET /api/v1/agents/geerg-gergrg-rgergerg/stats
Authorization: Bearer <admin_token>
Response (200 OK):
json
  "propertyCount": 5,
  "viewCount": 150,
  "lastUpdated": "2025-07-01T08:50:00Z"
```

```
8. GET /api/v1/agents/{uuid}/export
```

```
Request:
```

```
http
GET /api/v1/agents/53/stats
Authorization: Bearer <admin_token>
Response (200 OK):
Content-Type: text/csv
Тело: uuid,title,price\n1,Квартира,4500000
9. PUT /api/v1/agents/{uuid}/block
Request:
http
GET /api/v1/agents/geerg-gergrg-rgergerg/stats
Authorization: Bearer <admin_token>
Response (200 OK):
json
  "userUuid": "geerg-gergrg-rgergerg",
  "role": "AGENT",
  "regionId": 1,
  "firstName": "Иван",
  "lastName": "Иванов",
  "email": "ivan@example.com",
  "phone": "+79167778899",

  "updatedAt": "2023-09-01T10:00:00Z",
  "isBlocked": true
```

```
10. PUT /api/v1/agents/{uuid}/unblock
```

Request:

```
http

GET /api/v1/agents/geerg-gergrg-rgergerg/stats
Authorization: Bearer <admin_token>

Response (200 OK):

json

{
    "userUuid": "geerg-gergrg-rgergerg",
    "role": "AGENT",
    "regionId": 1,
    "firstName": "Иван",
    "lastName": "Иванов",
    "email": "ivan@example.com",
    "phone": "+79167778899",
    "createdAt": "2023-09-01T10:00:00Z",
    "updatedAt": "2023-09-01T10:00:00Z",
    "isBlocked": false
}
```

Authentication API

1. POST /api/v1/auth/login

Request:

```
http

A

json

{
    "email": "ivan@example.com",
```

```
"password": "securePassword123"
}
Response (200 OK):
json
  "accessToken": "eyJhbGci0iJIUzI1NiIsInR5cCI6IkpXVCJ9...",
  "refreshToken": "eyJhbGci0iJIUzI1NiIsInR5cCI6IkpXVCJ9...",
  "expiresIn": 3600,
  "role": "AGENT"
}
2. POST /api/v1/auth/register
Request:
http
POST /api/v1/auth/register
json
  "firstName": "Алексей",
  "lastName": "Смирнов",
  "email": "stanislavyakunin76@gmail.com",
  "password": "1234567890",
  "password_confirmation": "1234567890",
  "phone": "+1234567890"
}
Response (201 Created):
json
  "uuid": 100,
  "firstName": "Алексей",
  "lastName": "Смирнов",
  "email": "alex@example.com",
```

"role": "USER",

```
"accessToken": "eyJhbGci0iJIUzI1NiIsInR5cCI6IkpXVCJ9...",
"refreshToken": "eyJhbGci0iJIUzI1NiIsInR5cCI6IkpXVCJ9..."
}
```

3. POST /api/v1/auth/refresh

Request:

```
http
POST /api/v1/auth/refresh

json
{
    "refreshToken": "eyJhbGci0iJIUzI1NiIsInR5cCI6IkpXVCJ9..."
}
Response (200 OK):
```

Особенности реализации:

1. Авторизация:

"expiresIn": 3600

}

- o Защищенные методы требуют Authorization: Bearer <token>
- Роли: ADMIN, REGIONAL_ADMIN, AGENT, GUEST

"accessToken": "eyJhbGci0iJIUzI1NiIsInR5cCI6IkpXVCJ9...",

- 2. Ошибки:
 - 401 Unauthorized: Неверные учетные данные
 - 403 Forbidden: Нет прав доступа
 - 404 Not Found: Ресурс не найден
 - o 400 Bad Request: Ошибки валидации
 - 409 Conflict: Ошибка при попытке сделать запись.
 - o 500 Internal Server Error: Внутренняя ошибка сервера

- o 502 Bad Gateway: неверный адрес
- 3. Валидация:
 - o Bean Validation (JSR-380) для всех DTO
 - Глобальный обработчик исключений
- 4. Пагинация:
 - o Стандарт Spring Pageable (page, size)
 - Ответ содержит метаданные пагинации
- 5. Даты:
 - Формат ISO-8601 (yyyy-MM-dd'T'HH:mm:ss'Z')
 - UTС временная зона

Компетенции и доступ к эндпоинтам

Роли и их компетенции

ADMIN: Полный доступ к системе (управление всеми агентами, свойствами, авторизация).

REGIONAL_ADMIN: Управление агентами и недвижимостью только в своем регионе (проверяется по regionUuid).

AGENT: Управление своими свойствами и просмотр своей статистики/портфеля.

GUEST (без токена): Доступ только к публичным данным (GET /users, /users/{code}/properties).

Доступ к эндпоинтам
